Subject: Responses received so far to FOIA requests

Attachments: SFXA07.pdf

On Rhesus Macaque 31031, attached are records received from UC Davis, no charge because less than 50 pages. I'm also sending you the hard copy via regular mail.

On Rhesus Macaque 13481-F, 04-01-83, Oregon Health & Science University requested $6.50, which I sent on June 15. Records not yet received.

On 00PM 0021 Male Macaque 1973 at University of Utah re the $200 charge for records and the possibility of doing a USDA request, I'm unfortunately overwhelmed with events and commitments in my own life and have no real free time to pursue it. Sorry.

On 788E F Rhesus DOB unknown, UC Los Angeles is searching for records; no indication of page count or charge.

RE: California Public Records Act Request

Dear Ms. Vandegrift,

This is in response to your letter dated March 24, 2005, in which you request all records pertaining to rhesus macaque 31031. Enclosed please find the following records:

1) All of the pages from the health jacket of 31031 (29 pages)
2) Animal Demographic/Medical Profile for animal 31031 (4 pages)

We have redacted personally identifying information concerning individuals directly involved in research activities concerning primates due to verbal and physical harassment, including death threats, which have been made against these individuals. This information is withheld pursuant to section 6255 of the California Public Records Act, which permits the University to not disclose records when the public interest served by not making the records public clearly outweighs the public interest served by disclosure of the record. In this case the public interest in withholding personally identifying information about these individuals due to actual harassment and threats of harassment that have occurred and continue to occur clearly outweighs the public interest in the disclosure of this information. See, e.g., Times Mirror Co. v. Superior Court, 53, Cal.3d 1325 (1991) (public interest in withholding the appointment calendars of the Governor of California due to "potential threat to the Governor's physical security" outweighed public interest in disclosure of the calendars); New York Times Co. v. Superior Court, 218 Cal.App.3d 1579 (1990) (names of persons who have violated water allocation limits may be withheld when there is evidence that release of such information may subject those persons to harassment or assault).

For the same reasons, we have also redacted information that would identify the locations within the Primate Center where these primates are housed in order to ensure the safety and security of the animals and individuals involved in research concerning the animals. Similarly, project codes (used for identification of the research project and associated researchers) have been

redacted in order to preserve and maintain the academic freedom of the University's animal researchers. There is little or no legitimate public interest in obtaining information that would link individual researchers with specific research projects, and the invasion of privacy and security associated with such a disclosure weighs significantly against the public interest.

Since the information we are providing you is less than fifty pages, we are waiving our normal fee of $.10/page for the reproduction of these pages.

Should you have any additional requests please let me know.

Sincerely,

Lynette Temple

Lynette Temple
Information Practices Coordinator

	Initials									

(Approximate Bottle Change Time)

All feedings are recorded at the time the next bottle is filled (7:30am intake is recorded at 9:30am). Volumes are rounded to the nearest 5ml, with the following exception: Volumes less than 5ml are estimated to the nearest 1ml. Zero intakes require notation on animal's observation sheet. All bottles are removed at 9:30pm. Note dextrose feedings as "5% dex" (or 10% if applicable). (Rev. 3/4/98 - LA)
