Diagnostic Laboratory Histopathology Report

Investigator Tissue Program ID J91386 Date Of Death 1-25-06
Species Mn Clinical Veterinarian K. Vogel Date Of Necropsy 01-25-06

Type of report: **X Final Report** Preliminary Report Amended Report

Histological Findings:

Colon: The serosal surface of the colon is expanded by neovascularization, dilation of lymphatics, and fibrous connective tissue surrounding myriads of multifilament fibers (cotton). Individual fibrillar elements are angular and glow under polarized light. Fibers are surrounded by numerous multinucleated giant cells, fibrocytes, and histiocytes admixed with degenerative neutrophils and cellular debris. Fibers are contained (walled-off) by 3-10 layers of laminated fibrocytes and markedly hypertrophic vasculature.

Vasculature: Vasculature within multiple tissues throughout the body is hypertrophic. The tunica media is markedly, segmentally expanded. The tunica intima is similarly segmentally expanded in occasional vessels. The elastic lamina is disrupted in vessels with moderate to severe hyperplasia. The aorta demonstrates mild atherosclerotic changes (deposition of foam cells, raised and irregular endothelium, and mild mucinous degeneration of smooth muscle cells)

The following tissues were examined and found to be within normal limits for the WaNPRC colony based on the age, sex, and species: Cerebrum, liver, spleen, gall bladder, lung, pancreas, adrenal gland, heart, stomach, small intestines, colon, and rectum.

Comments: The histologic section examined represents an incidental finding from a TDP animal. An unknown structure (abscess) within the ventral abdomen of this animal was diagnosed, imaged, and cultured by the clinical staff. The unknown structure was diagnosed at gross necropsy as a gossypiboma. Vascular changes similar to those present within this animal have been diagnosed in multiple WaNPRC colony animals. Historically, the pathogenesis of such lesions has thought to include Rhadinovirus infection.

Principal Diagnosis:

-
- 1) Abdomen: Gossypiboma adherent to the serosal surface of the colon
 - 2) Aorta: Mild atherosclerosis
 - 3) Vasculature: Diffuse, mild to severe, chronic, segmental tunica media and intima hypertrophy

DIAGNOSTIC LABORATORY NECROPSY REPORT

Requester Keith Vogel Investigator Tissue Program Animal ID # J91386
Species Mn Requester's Phone 616-1708

Date of Necropsy 01-25-06 Time 9:30 am Pathologist R.R. Hukkanen

Nutritional Condition: Adequate Marginal Poor **Obese**

Other Tests Required: Sero Micro Histo Parasit Other

Gross Findings:

A 14 year old obese adult female macaque presents to necropsy for tissue distribution. Hydration and musculature are adequate; ingesta/feces are present within the small intestines, cecum, and colon. Upon internal examination, a 4cm spherical mass is present within the lower left abdominal quadrant. Mesenteric tissue is loosely adherent to the colon and spherical mass. The mass is tightly adherent to the dorsal serosa of the descending colon approximately 15 cm proximal to the rectum; underlying colonic mucosa is within normal limits. The mass is encapsulated in 3-5mm of pink, fibrous connective tissue. On cut section, the mass contains approximately 2 ml of opaque, viscous, yellow fluid surrounding a central core of compressed fibers (surgical gauze). Remnant uterine tissue is adherent to the bladder and colonic serosal surfaces. Remaining abdominal and thoracic organs are within normal limits.

Cause of death: euthanasia

Comments:

This animal underwent ovariohysterectomy on 8/25/05 for reproductive difficulties (non-viable fetuses and multiple c-sections). The uterus demonstrated moderate stromal hyperplasia. The ovaries were bilaterally polycystic. During post surgical monitoring, the clinical staff noted the presence of an abdominal mass (10/4/05). The mass was imaged; an ultrasound guided biopsy yielded sterile fluid. The animal was subsequently monitored. The foreign body was an incidental finding which did not adversely affect the health of this animal. The abscess was sterile and walled off. Euthanasia of this animal was performed as a part of the tissue program, as such; multiple tissues will not be available for histological analysis including the kidneys, cerebellum, eyes, and esophagus.

Final Report

X Final Report to Follow

Morphologic diagnosis:

-
- 1) Colonic serosa: Encapsulated foreign body (surgical gauze)
-

Accession #05-129
Date 07-25-05

DIAGNOSTIC LABORATORY NECROPSY REPORT

Requester Pat Delio Investigator Colony Animal ID # J91386
Species Mnem Requester's Phone 616-1708

Date of Necropsy 07-25-05 Time 6pm Pathologist R.R. Hukkanen

Nutritional Condition: Adequate Marginal Poor Obese

Other Tests Required: Sero Micro Histo Parasit Other

Gross Findings:

A uterus and associated Fallopian tubes, fimbria, and ovaries are examined post ovariectomy. The uterus is moderately enlarged, roughly the size of a small pear. On cut section, the myometrium is well demarcated from the hemorrhagic endometrium and is divided into two concentric layers. The inner layer is pink while the outer layer is pink/white. The myometrium is diffusely thickened (hyperplasia) and predominates (endometrium to myometrium 1:6).

Cause of death: not applicable

Comments: This uterus was removed after a history of reproductive difficulties (c-sections and non-viable fetuses), and a 10 day course of menorrhagia. According to Cramer et al. (J Pediatr Adolesc Gynecol 16:301-306), myometrial hyperplasia may be related to an ongoing breakdown and repair of the endometrial lining, leading to pathology in the underlying muscular wall (responsiveness of smooth muscle cells to growth factors involved in tissue repair). The predominant clinical symptoms in women with myometrial hyperplasia are dysmenorrhea and abnormal bleeding. A zone of myometrial differentiation, similar to that seen at necropsy, is described radiologically in such cases. A definitive diagnosis of myometrial hyperplasia requires fulfillment of cellular histologic criteria.

Final Report

X Final Report to Follow

Morphologic diagnosis:

1. uterus: diffuse, chronic, moderate myometrial hyperplasia

RRH

Diagnostic Laboratory Histopathology Report

Investigator Colony Animal ID J91386 Date Of Death N/A
Species M.nm Clinical Veterinarian Delio Date Of Surgery 8/25/05

Type of report: Final Report Preliminary Report Amended Report

Histological Findings:

Surgical biopsy sample consisting of uterus, oviduct, and ovaries is examined.

Diffusely, there is a moderate degree of uterine stromal hyperplasia. Stromal tissue extends from the glandular myometrium, into the muscular wall of the endometrium, dissecting between, encircling, and individualizing smooth muscle cells and bundles. Stromal tissue extends into the oviduct and expands the supportive tissue (lamina propria) of the ampulla.

Multiple antral follicles measuring up to 3mm in diameter are present within sections of ovary examined; corpora albicans are absent (polycystic ovary). The stromal component of the ovary is increased and contains concentric bands of free erythrocytes (hemorrhage) surrounding multiple follicles. Scattered within the stroma are primordial and developing follicles.

Comments:

Stein-Leventhal Syndrome or polycystic ovarian disease (POD) is a metabolic reproductive disorder of females. Clinical characteristics of this condition include amenorrhea, oligomenorrhea, hyperandrogenism, hyperinsulinemia, and infertility. Clinically this animal was experiencing abnormal menstruation and infertility. In addition, POD (and accompanying chronic anovulation) predisposes to endometrial hyperplasia as seen in this case

Zhou R, Bird IM, Dumesic DA, Abbott DH. Adrenal hyperandrogenism is induced by fetal androgen excess in a rhesus monkey model of polycystic ovary syndrome.

J Clin Endocrinol Metab. 2005 Sep 20

Stubbs SA, Hardy K, Da Silva-Buttkus P, Stark J, Webber LJ, Flanagan AM, Themmen AP, Visser JA, Groome NP, Franks S. Anti-Mullerian Hormone (AMH) protein expression is reduced during the initial stages of follicle development in human polycystic ovaries.

J Clin Endocrinol Metab. 2005 Jul 19

Diagnosis(es):

- 1) Moderate, diffuse, chronic endometrial stromal hyperplasia
- 2) Bilateral polycystic ovaries

Pathologist(s): R. R. Hukkanen

*** Snomed Reports *** (All 10s; All 26 Records From 01-APR-03 To 09-JAN-07)

(Please note that some test results are available
only through MICRO and VIRUS.)

Clinical Procedure from 14-JUL-03 to 14-JUL-03:
with TB test.
PHYSICAL EXAMINATION, COMPLETE performed.

Post-Surgical Treatment from 19-SEP-03 to 31-OCT-03:

TREATMENT AND/OR OBSERVATION performed.

Following: SURGERY, CLINICAL performed.

19-SEP-03 19-SEP-03 Buprenorphine .13 mg IM SID.
19-SEP-03 19-SEP-03 Ketoprofen 45 mg PO SID.
20-SEP-03 20-SEP-03 Buprenorphine .13 mg IM BID.
20-SEP-03 21-SEP-03 Ketoprofen 45 mg PO BID.
20-SEP-03 29-SEP-03 Cephalexin 225 mg PO BID.
24-SEP-03 06-NOV-03 Vitamins, Prenatal 1 Tab PO SID.

ROUTINE MONITORING performed.

The above is followed by CBC AND BLOOD CHEMISTRY performed.

10-OCT-03 10-OCT-03 Atropine .2 mg IM SID.
10-OCT-03 10-OCT-03 Ketamine HCl 100 mg IM SID.

The examination showed ANEMIA.

13-OCT-03 31-OCT-03 Vitamins, Prenatal 1 Tab PO SID.

ROUTINE MONITORING performed.

The above is followed by CBC AND BLOOD CHEMISTRY performed.

23-OCT-03 23-OCT-03 Ketamine HCl 100 mg IM SID.

ROUTINE MONITORING performed.

The above is followed by CBC AND BLOOD CHEMISTRY performed.

ESR (Blood Sedimentation Rate) performed.

31-OCT-03 31-OCT-03 Atropine .2 mg IM SID.

31-OCT-03 31-OCT-03 Ketamine HCl 100 mg IM SID.

The examination showed TREATMENT RESPONSE, GOOD.

-Fluid Draw from 23-OCT-03 to 23-OCT-03:

Administration of medication during fluid draw performed.

23-OCT-03 23-OCT-03 Ketamine HCl 100 mg IM SID.

Master History Report Printed on 22-Jan-2007 for user [REDACTED]

-Fluid Draw from 31-OCT-03 to 31-OCT-03:

Administration of medication during fluid draw performed.
31-OCT-03 31-OCT-03 Atropine .2 mg IM SID.
31-OCT-03 31-OCT-03 Ketamine HCl 90 mg IM SID.

Clinical Procedure from 02-FEB-04 to 02-FEB-04:

Administration of medication during TB testing performed.
02-FEB-04 02-FEB-04 Atropine .2 mg IM SID.
02-FEB-04 02-FEB-04 Ketamine HCl 100 mg IM SID.

Clinical Procedure from 02-FEB-04 to 02-FEB-04:

with TB test.
PHYSICAL EXAMINATION, COMPLETE performed.

Clinical Disorder from 27-JUL-04 to 27-AUG-04:

PREGNANCY, SECOND TRIMESTER.
HEMORRHAGE of VAGINA.
27-JUL-04 27-JUL-04 Atropine .4 mg IM SID.
27-JUL-04 27-JUL-04 Ketamine HCl 80 mg IM SID.
UTERUS. ULTRASOUND IMAGERY PROCEDURE performed.
The examination showed ABORTION, COMPLETE.
28-JUL-04 03-AUG-04 Cephalexin 225 mg PO BID.
28-JUL-04 27-AUG-04 Vitamins, Prenatal I Tab PO SID.
ROUTINE MONITORING performed.
PHYSICAL EXAMINATION, COMPLETE performed.
CBC AND BLOOD CHEMISTRY performed.
27-AUG-04 27-AUG-04 Atropine .4 mg IM SID.
27-AUG-04 27-AUG-04 Ketamine HCl 100 mg IM SID.
TREATMENT RESPONSE, GOOD.

Clinical Procedure from 30-JUL-04 to 30-JUL-04:

Administration of medication during TB testing performed.
30-JUL-04 30-JUL-04 Atropine .4 mg IM SID.
30-JUL-04 30-JUL-04 Ketamine HCl 100 mg IM SID.

Clinical Procedure from 30-JUL-04 to 30-JUL-04:

with TB test.
PHYSICAL EXAMINATION, COMPLETE performed.

-Fluid Draw from 24-AUG-04 to 24-AUG-04:

Administration of medication during fluid draw performed.
24-AUG-04 24-AUG-04 Atropine .48 mg IM SID.
24-AUG-04 24-AUG-04 Ketamine HCl 120 mg IM SID.

-Fluid Draw from 09-SEP-04 to 09-SEP-04:

Administration of medication during fluid draw performed.
09-SEP-04 09-SEP-04 Atropine .33 mg IM SID.
09-SEP-04 09-SEP-04 Telazol 42 mg IM SID.

Clinical Procedure from 09-SEP-04 to 09-SEP-04:

Dental Prophylaxis, Cleaning performed.
The examination showed moderate to severe, DENTAL CALCULUS.
SUPERNUMERARY STRUCTURE of MAXILLARY RIGHT THIRD MOLAR.
SUPERNUMERARY STRUCTURE of MANDIBULAR LEFT THIRD MOLAR.

Clinical Disorder from 07-JAN-05 to 13-JAN-05:

BITE WOUND of MULTIPLE SITES.
The above is due to INJURY DUE TO FIGHTING.
07-JAN-05 07-JAN-05 Atropine .4 mg IM SID.
07-JAN-05 07-JAN-05 Ketamine HCl 150 mg IM SID.
REMOVED FROM GROUP.
MULTIPLE SITES. INCISION AND DRAINAGE performed.

Master History Report Printed on 22-Jan-2007 for user .

CBC AND BLOOD CHEMISTRY performed.

The examination showed ANEMIA.

Following: TRAUMATIC INJURY.

07-JAN-05 07-JAN-05 Benzathine/Procaine penicillin G 300000 Unit IM SID.

07-JAN-05 07-JAN-05 Ketoprofen 50 mg IM SID.

08-JAN-05 09-JAN-05 Ketoprofen 50 mg PO BID.

08-JAN-05 22-JAN-05 Vitamins, Prenatal 1 Tab PO SID.

09-JAN-05 13-JAN-05 Cephalexin 225 mg PO BID.

CBC AND BLOOD CHEMISTRY performed.

The examination showed TREATMENT RESPONSE, GOOD.

Clinical Procedure from 13-JAN-05 to 13-JAN-05:

Administration of medication during TB testing performed.

13-JAN-05 13-JAN-05 Atropine .4 mg IM SID.

13-JAN-05 13-JAN-05 Ketamine HCl 100 mg IM SID.

Clinical Procedure from 13-JAN-05 to 13-JAN-05:

with TB test.

Dental Prophylaxis, Cleaning performed.

PHYSICAL EXAMINATION, COMPLETE performed.

Clinical Disorder from 14-MAR-05 to 14-MAR-05:

WOUND SUPERFICIAL of LEFT HAND.

PHYSICAL EXAMINATION, LOCALIZED performed.

Cage side.

Clinical Procedure from 15-MAR-05 to 15-MAR-05:

ECCHYMOSIS of LEFT HAND.

ROUTINE MONITORING performed.

Clinical Procedure from 09-AUG-05 to 09-AUG-05:

Administration of medication during TB testing performed.

09-AUG-05 09-AUG-05 Ketamine HCl 100 mg IM SID.

Clinical Procedure from 09-AUG-05 to 09-AUG-05:

with TB test.

PHYSICAL EXAMINATION, COMPLETE performed.

Clinical Disorder from 24-AUG-05 to 09-SEP-05:

Pathology report number 129-05A.

Prolonged Vaginal Bleeding.

Adequate Hydration.

BC5 Obese.

ENLARGEMENT of UTERUS. ABNORMAL MENSES. PHYSICAL EXAMINATION, COMPLETE performed.

Temp. 99.7.

24-AUG-05 24-AUG-05 Atropine .4 mg IM SID.

24-AUG-05 24-AUG-05 Cephalexin 250 mg PO SID.

24-AUG-05 24-AUG-05 Ketamine HCl 150 mg IM SID.

24-AUG-05 24-AUG-05 Ketoprofen 75 mg PO SID.

25-AUG-05 29-AUG-05 Ketoprofen 75 mg PO BID.

25-AUG-05 31-AUG-05 Cephalexin 250 mg PO BID.

26-AUG-05 27-AUG-05 Buprenorphine .15 mg IM BID.

09-SEP-05 09-SEP-05 Atropine .4 mg IM SID.

09-SEP-05 09-SEP-05 Ketamine HCl 100 mg IM SID.

FIBROUS THICKENING of UTERUS. ABNORMAL MENSES. ULTRASOUND IMAGERY PROCEDURE performed.

ENLARGEMENT of OVARY. ULTRASOUND IMAGERY PROCEDURE performed.

Right Ovary.

BLOOD. CBC, Blood Chemistry & ESR performed.

HCT = 29, HGB = 9, ESR = 36.

Master History Report Printed on 22-Jan-2007 for user:

24-AUG-05 07-SEP-05 Vitamins, Prenatal 1 Tab PO SID.
FIBROUS THICKENING of Cervix. PALPATION, DIGITAL performed.
CBC, Blood Chemistry & ESR performed.
HCT - 31 HGB - 9.5 - ESR - 12.
BLOOD COLLECTION performed.
BLOOD COLLECTED FOR RETIC CT 9-9-05= NONREGEN ANEMIA BUT OVERALL ANEMIA IMPROVED.
ovn surgery done on 8/25/05 vaginal bleeding obviosly resolved as a result of sx Case discharged MG.
TREATMENT RESPONSE, GOOD.

Clinical Procedure from 04-OCT-05 to 27-OCT-05:
complete physical chief complaint of dry skin incidental mass found in L caudal abd. OVH performed in Aug/05.
DRY SKIN, XEROSIS of ENTIRE BODY. ADMINISTRATION OF MEDICATION performed.
skin around chest,both arms and inguinal area looked flushed along w dry skin mostly about the face.
04-OCT-05 04-OCT-05 Atropine .4 mg IM SID.
04-OCT-05 04-OCT-05 Ketamine HCl 170 mg IM SID.
06-OCT-05 11-OCT-05 Diphenhydramine 25 mg PO BID.
MASS, LOCALIZED of ABDOMEN. PHYSICAL EXAMINATION, COMPLETE performed.
mass palp in L caudal abd firm tennis ball sized OVH done in Aug/05.
MASS, LOCALIZED of LYMPH NODES, MULTIPLE SITES. Increase of. PHYSICAL EXAMINATION, COMPLETE performed.
all lnn enlarged esp axillary.
ULTRASOUND IMAGERY PROCEDURE performed.
mass confirmed by usound.
CBC, Blood Chemistry & ESR performed.
bloodwork appears wnl MG.
ABSCESS of ABDOMEN. ASPIRATION. ADMINISTRATION OF MEDICATION performed.
07-OCT-05 07-OCT-05 Atropine .4 mg IM SID.
07-OCT-05 07-OCT-05 Cefazolin 250 mg IV SID.
07-OCT-05 07-OCT-05 Ketamine HCl 170 mg IM SID.
08-OCT-05 20-OCT-05 Cephalexin 250 mg PO BID
Comments: abscess L caudal abd.
MICROBIAL SMEAR EXAMINATION performed.
Bact culture and gram stain and sens of abscess contents.
ULTRASOUND IMAGERY PROCEDURE performed.
abscess L caudal abdomen 10-7-05.
ABSCESS of ABDOMEN. Decrease of. ULTRASOUND IMAGERY PROCEDURE performed.
follow up usound post start of tx 10-13-05 abscess decr in size and less fluid-filled MG.
ABSCESS of ABDOMEN. ULTRASOUND IMAGERY PROCEDURE performed.
10-27-05 Abscess plateaued in size looks more consolidated on u-sound
-feels more adhered to abd wall.
27-OCT-05 27-OCT-05 Atropine .4 mg IM SID.
27-OCT-05 27-OCT-05 Ketamine HCl 120 mg IM SID.
BLOOD. CBC, Blood Chemistry & ESR performed.
10-27-05 drew blood since animal was sedated....CBC/Chem/ESR all wnl.
10-28-05 Animals case discussed at vet meeting and decision made to send this animal for a combined clinical and tissue-program necropsy at a later date. The clinical portion of interest would be the mass/sterile abscess post OVH. This animal is stable enough to have necropsy scheduled as late as December. Case discharged for now. MG.
RELEASED FROM TREATMENT, UNDER OBSERVATION.

Clinical Disorder from 12-JAN-06 to 12-JAN-06:
Physical exam,routine TB testing 1/12/06.
Adequate Hydration.
BC4 Over-conditioned.

Master History Report Printed on 22-Jan-2007 for use.

PYHICAL EXAMINATION, COMPLETE performed.

MG 1/12/06.

MASS, LOCALIZED of LEFT LOWER QUADRANT OF ABDOMEN.

EYELIDS, RIGHT. TB Testing performed.

1/12/06.

ALL TEETH. Dental Prophylaxis, Cleaning performed.

Clinical Procedure from 12-JAN-06 to 12-JAN-06:

Administration of medication during TB testing performed.

12-JAN-06 12-JAN-06 Atropine .4 mg IM SID.

12-JAN-06 12-JAN-06 Ketamine HCl 120 mg IM SID.

Clinical Procedure from 12-JAN-06 to 12-JAN-06:

with TB test.

Dental Prophylaxis, Cleaning performed.

PYHICAL EXAMINATION, COMPLETE performed.

Clinical Disorder from 25-JAN-06 to 25-JAN-06:

Culture purulent discharge from ascess site left lower abdomen 1/25/06.

Adequate Hydration.

BC5 Obese.

ABSCESS of ABDOMEN. SPECIMEN COLLECTION, MICROBIOLOGY, SWAB performed.

culture of fluid 1/25/06.

Experimental Procedure from 25-JAN-06 to 25-JAN-06:

Tissue program.

Hydration Check, Not Applicable.

BC6 Body Condition Check, Not Applicable. INJECTION INTRAVENOUS performed.

25-JAN-06 25-JAN-06 Pentobarbital 100 mg IV SID.

MARK LOCATIONS OF WOUNDS: Mark diagram to indicate location of wound(s).

Wound Summary:

Ninira has several bites on body w/ abrasions from in compound Fighting. Animal is not P.G. but uterus felt firm. Removed from Compound.

Treatment Plan:

Lanced, flushed abrasions. Started on Analgesics + Anti-Biotic.

Diagnosis:

Trumas in Compound Fighting Bites over Body
Anemia Post Trauma.

m6.

Room/Cage # 089Q *22

Clinical Treatment Data Sheet

Animal #: J91386

Eartag #: _____

Room/Cage #: 089Q#22

Species: MN Sex: female/spayed Clinical: Research:

Investigator: Anderson Project #: _____

Clinical Start Date: 10-4-05 Clinical End Date: _____

Experimental Lenti Virus: _____

Inoculation/Exposure date: _____

Statistics:

Rectal Temp: 101.1 Heart Rate: _____ RespRate: _____ Weight: 8.5 kg

V
4

Experimental Procedure:

Clinical Signs: Vet tech noticed that the overall skin condition of this animal appears dry and flakey

Clinical Exam: Sedated animal to examine skin. skin on face abd appeared dry and flakey w some GOG over back and arms. Animal skin tone appeared overall more flushed than usual. All lnn were enlarged esp axillary. There is a large tennis ball sized mass located mid-caudal L abd which show up to some extent on U-sound. The mass is firm and somewhat irregular. The animal tongue appeared to be pitted or dimpled but no ulcerations per se

Plan:

Treatment:

Diagnosis: mass in caudal abd L side..animal had a complete OVH in Aug/05

Clinical Treatment Data Sheet

Animal #: J91386

Eartag #: _____

Room/Cage #: RR153 / I-089Q#

Species: Mn Sex: F Clinical: Research:
Investigator: Breeding Colony Project #: _____
Clinical Start Date: 8/24/05 Clinical End Date: 9.9.05
Experimental Lenti Virus: _____
Inoculation/Exposure date: _____

Statistics:

Rectal Temp: 99.7 Heart Rate: WNL RespRate: WNL Weight: 9.7 kg

Experimental Procedure:

Clinical Signs: Animal has been menstruating for the past 10 days. This is unusual for this animal.

Clinical Exam: On exam, animal is BAR-H, BC-3, adequate hydration. On palpation, uterus greatly enlarged and fibrotic. Cervix firm and open. On rectal manual finger palpation of cervix, approx. 4 mls of dark blood passed from vagina. Temp. 99.7, Blood for Chem, CBC, & ESR drawn. R/O endometriosis, endometritis, cystic ovaries, pyometra. -Discussed case w/ Drs. Vogel + Hukkanen. Start on Hox + analgesics. Schedule ovrt for 8.25

Plan: sedate, Ultrasound Uterus and ovaries, Chem, CBC, & ESR. Wait lab results. Very likely to do OVH and retire from breeding colony.

Treatment:

OUH

Diagnosis:

AB5
DD

WaNPR SURGERY AND ANESTHESIA D. 4 SHEET

Date:	Aug 25, 05			Animal #:	J91386
Investigator:	P Reedling			Species:	M. nemestrina
Procedure:	OVT			Sex:	F
Surgeon(s): Vee & Permana	Chargable time (hrs)			Weight:	9.6 kg
Project #:				Location:	RR153-13
ACC #:				Time of Sx:	1200

Pre-Anesthetic Drugs

Drug	Dose(mg)	Route	Time
Ketamine	120.	IM	11:40 AM
Alexpine	0.6	IM	11:40 AM

Peri-Operative Antibiotics

Drug	Dose(mg)	Route
Cefazolin	240.	IV

General Anesthesia Propofol 45.0 mg IV. 12pm

Anesthetic: 2-Isoflurane 3-N2O 5-Other _____
 6-Sevoflurane 7-Propofol 8-Fentanyl

Administered: 1-Mask 2-Trach Tube 5.5 mm

Anesthesia: Start- 12:00 End- 15:00

Ventilation: 1-Assisted 2-Non Assisted

Surgery: Start- 12:18 End- 15:00

O₂ Flow Rate: 2 l/min

Position of Animal: Supine

Analgesics

Analgesic	Dose(mg)	Route	Date	Time
Buprenorphine	0.15g	IM	8-25-05	15:00
Ketorolac	50mg	IM	8-25-05	15:00

Fluids Administered:

1-Saline 4-Lactated Ringers 5-D5W 8-Normosol-R

Route: IV Catheter Other _____

Total Volume Admin: 269 (ml)

Urine Output: (ml)

Procedure Information

The following Information should be filled out by the Surgeon or Research Affiliate

Procedure performed:

Ovario Hysterectomy

Complications:

N/A

Permanent Physical Alterations to Animal: Removed uterus & ovary unable to breed.

Total Blood Lost _____

Experimental Drugs/Isotopes Admin:

Fetus Taken: yes no Fetus number:

Sex: M/F Fetus weight:

Type of Procedure: 1-Major 2-Minor 5-Clinical 6-Experimental 8-Anesthetic Event
