

November 5, 2008

Nancy Gregory

Dear Ms. Gregory,

Enclosed please find copies of documents in response to your request under Wisconsin's Public Records Law. The request was initially made in your letter to Dr. Joseph Kemnitz on April 15, 2008, and was amended in your letter to me on June 27, 2008 in response to our denial on June 12, 2008 of your initial request.

One set of records is enclosed totaling 47 pages. We acknowledge that you paid the University for an estimated 50 pages, however, please note that the cost of mailing, which we are also allowed to charge you under Wisconsin Public Records Law (Wis. Stats. §19.35(3)(d)), amounts to more than the 50¢ total that you overpaid for the records. We will waive this mailing fee if you do not request reimbursement of the minor overage you paid in copy costs.

Note that the necropsy report is found on page 1 of the enclosed clinical records.

Information redacted from the enclosed records references the location where research animals are housed and research activities are performed (Wis. Stats. §19.85(1)(d)), references campus contact information and references personally-identifiable information pertaining to research staff (Wis. Stats. §19.35(1)(g)). Moreover, the Balancing Test inherent in the Public Records Law leads us to a determination that the public interest in preventing harassment of research staff outweighs the negligible public interest in disclosure of this information. The name of research collaborator is withheld per the Balancing Test as we believe that the public interest in preventing harassment of the collaborator outweighs the public interest in disclosure of this information. Finally, application of the Balancing Test leads us to a determination that information about a restricted-access web site should be redacted to prevent unauthorized use of the site. We feel that the potential for such unauthorized use and vandalism of vital clinical records significantly outweighs the public's negligible interest in knowing information that could allow access to this web site which is reserved for use by a very limited number of University staff.

As we have determined that the information described above should be redacted for the reasons stated, please note that this determination is subject to review under s. 19.37(1) or upon application to the attorney general or a district attorney.

Sincerely,

Richard R. Lane,
Associate Director

Necropsy: 98c113 Animal ID: rhaf72 Date: 1998-11-16 Account: gy84
 Remark: A culture taken at necropsy of colonic contents was negative for enteric pathogens. The severity of the histologic lesions in this patient was not correlated with the severity of the clinical symptoms, e.g. the reason for the precipitous worsening of the enteric disease in this patient cannot be determined histologically. The bronchiectasis present was interesting,

Diagnostic record 1:

t-59300 (colon, nos)
 d5-41700 (colitis, nos)
 g-a4430 (multifocal)
 t-00251 (epithelial cell, nos)
 m-54000 (necrosis, nos; cellular necrosis, nos)
 g-a0020 (moderate)

Diagnostic record 2:

t-58000 (small intestine, nos)
 g-a0020 (moderate)
 g-a4430 (multifocal)
 g-a2700 (chronic)
 d5-41704 (enteritis, nos)

Diagnostic record 3:

d5-60100 (inguinal hernia, nos)
 g-a1010 (left)

Diagnostic record 4:

t-28800 (both lungs)
 g-a0010 (mild)
 g-a4430 (multifocal)
 d2-30700 (bronchiectasis)

Diagnostic record 5:

t-35010 (atrioventricular valve, NOS)
 g-a1010 (left)
 t-32160 (endocardium of atrium, nos)
 m-78000 (fibrosis, nos; fibrosis thickening)

Diagnostic record 6:

df-d0590 (euthanasia)
